

# Labrador Puppy

1. First, carve out the circle of each eye, then, after, the lines around each eye.
2. Carve out the highlights on the nose, and then the muzzle.
3. Next, carve out the line of his mouth, then the chin, then carve the area on the forehead out as several smaller sections to remove it more easily.
4. Finally, carve the lines of each ear and the line of his neck.
