

## The Dance Duo

**1. First, use a shading tool or wood gouge to shave out several of the cornstalks. (The sections to shade are dark gray.)**

**2. Use a carving saw to cut out their faces and the areas between their bodies.**

**3. Carve the large area of the moon into several smaller pieces for easier removal.**

**4. Finally, carve the area beneath each outer arm and then the remaining cornstalks.**

**(All areas of this design could be cut through rather than shaved. The choice is up to you! Please note that due to the detail, this pattern is much easier to carve when you enlarge the pattern and put it on a large pumpkin!)**
