

Witch's Knot

- 1. First, carve out the center diamond then the smaller inside sections.**
- 2. Next, in a clockwise fashion, carve out the remaining small sections in the center.**
- 3. Carve out these next sections clockwise, being careful not to rest your hand on the center cut out areas.**
- 4. Finally, carefully carve out the largest remaining sections in the background. If you are having trouble removing these pieces, cut them up into several smaller pieces to make them easier to remove without breaking the design.**
